	DESCRIBE THE P	RESENT A 1D ORI	GINAL (If kno	PHYSICA	L APPEARANCE			

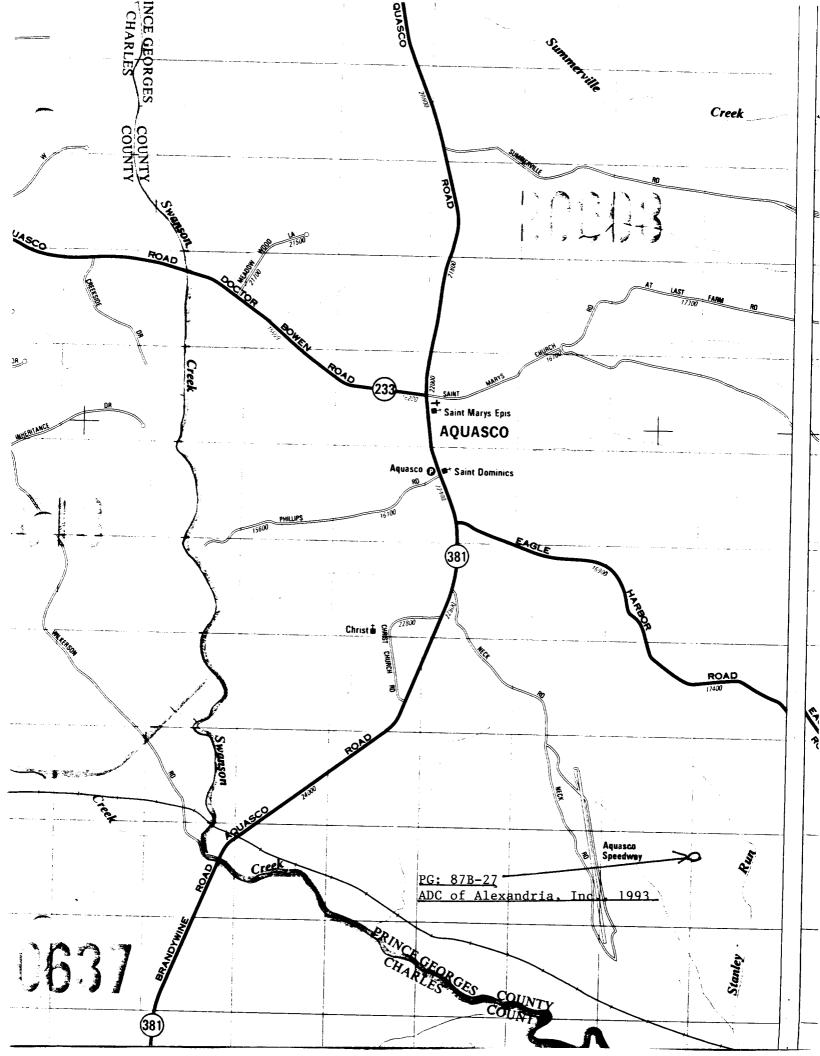

The house is a frame structure built in two sections. The north end is 1-1/2 stories, with an irregular three-bay, main (east) facade. The 20th century south end is two stories. On the south gable end of the north wing is an external chimney (now an internal chimney rising through the addition). The sheathing is weatherboard with a wide bead (about 1/2"). The window frames have a beaded fascia with a moulded surround.

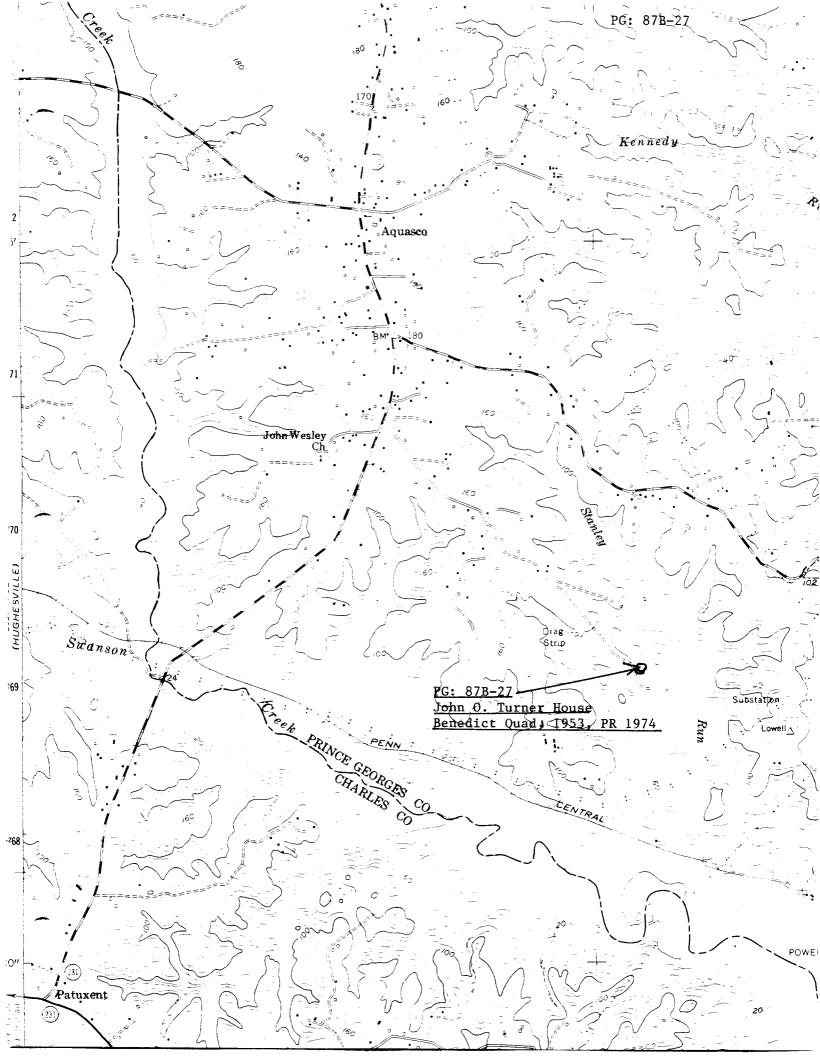

In plan, the house has two rooms divided by a frame partition wall. The staircase rises between the two rooms. The loft is also two rooms, separated by a vertical board partition wall. The room is ceiled below the collars. The rafters are mortised, tenoned, and pegged at the ridge.
